

Eagle Scout Project Request for the Youth Horticulture Education Program (YHEP) Youth Garden Located in the Extension Botanic Garden

The Youth Horticulture Education Program (YHEP) is a team of three individuals who teach plant science, gardening and food systems to the youth of Clark County.

<https://extension.unr.edu/youth-horticulture/default.aspx>

YHEP teaches youth 3-23 years of age in this garden. The majority of learning and work done in this garden is by special needs adults, aged 18-23, that are housed in programs through CCSD called PACE & POST.

<https://sites.google.com/nv.ccsd.net/transitionservices/teacher-portal/ccsd-transition-programs>

These students learn work skills, communication skills, and practice cooperation and safety in an outdoor garden environment.

As part of our program, we have a youth garden located at 8050 Paradise Rd. LV, NV 89123.

This garden is now 15 years old and in need of a renovation.

This project is project management based and not labor based.

Though some labor would be appreciated it is not required.

Project will need the following -

- Measurement and acquisition of donation of short chain link fencing with 2 gates to surround the entire youth garden.
- Measurement and acquisition of donation of soil and mulch for garden beds.
- Management of a budget if donations are short or not acquired.

Please contact Nicole Hansen at hansenn@unr.edu or 702-257-5536 for more information.
